

step 0:

let's look at textbook P190-192 step 1, 2, 3

we are moving to file Faces.swift

here the codes corresponding to draw out the bounding box

you can customise the box colour in step 3

```
context.setStrokeColor(UIColor.red.cgColor)
```

step p:

let's look at textbook P192 step 5

we are updating the entire `getFaces()` to incorporate the box drawing function (`drawOn()` )
